ONLINE QUIZ SYSTEM

User Stories, Individual Requirements and System Requirements

1. USER STORIES

1. As a user, I want to register an account so that I can access the quiz system.
2. As a user, I want to log in so that I can access my quizzes and results.
3. As a user, I want to view available quizzes so that I can choose a quiz.
4. As a user, I want to select a quiz category or subject so that I can attempt relevant questions.
5. As a user, I want to answer multiple-choice questions so that I can complete the quiz.
6. As a user, I want to see the remaining time so that I can manage my time during the quiz.
7. As a user, I want to submit my quiz so that my answers can be evaluated.
8. As a user, I want my score to be calculated automatically so that I can know my performance.
9. As a user, I want to view my quiz results so that I can understand my performance.
10. As a user, I want to view my previous attempts so that I can track my progress.
11. As a user, I want to see the correct answers after completing a quiz so that I can learn from my mistakes.
12. As an admin, I want to create quizzes so that users can attempt new quizzes.
13. As an admin, I want to add, edit, and delete questions so that quiz content can be maintained.
14. As an admin, I want to manage quiz categories so that quizzes can be organized properly.
15. As an admin, I want to view user results so that I can monitor quiz performance.

2. INDIVIDUAL REQUIREMENTS

Functional Requirements

1. The system shall allow users to register an account.
2. The system shall allow registered users to log in and log out.
3. The system shall allow users to view available quizzes.
4. The system shall categorize quizzes based on subjects or topics.
5. The system shall display multiple-choice questions to users.
6. The system shall allow users to select an answer for each question.
7. The system shall provide a time limit for quizzes where applicable.
8. The system shall allow users to submit completed quizzes.
9. The system shall automatically calculate the user's score.
10. The system shall display the user's quiz result after submission.
11. The system shall store the user's quiz attempts and scores.
12. The system shall allow users to view their previous quiz results.
13. The system shall display correct and incorrect answers after submission.

14. The system shall allow administrators to create quizzes.
15. The system shall allow administrators to add, edit, and delete questions.
16. The system shall allow administrators to define the correct answer for each question.
17. The system shall allow administrators to manage quiz categories.
18. The system shall allow administrators to set the quiz duration.
19. The system shall allow administrators to view user scores and results.
20. The system shall support different difficulty levels for quizzes.

Non-Functional Requirements

21. The system should have a simple and user-friendly interface.
22. The system should provide quick responses to user actions.
23. The system should securely store user and quiz information.
24. The system should maintain accurate quiz scores and results.
25. The system should be reliable and available whenever required.
26. The system should be easy to maintain and update.
27. The system should prevent unauthorized access to administrative functions.
